

Palo Alto Networks and AlgoSec Partnership

Technology Segment: Network Security Configuration Management

The Palo Alto Networks Technology Partner Program includes a select group of partners that deliver solutions or products that interoperate with the next-generation firewall.

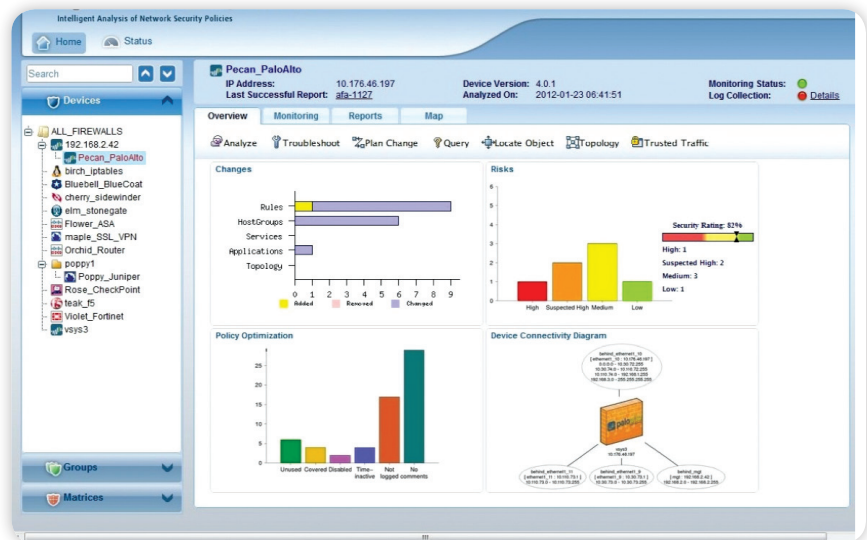

HIGHLIGHTS

- Streamlined firewall operations with complete visibility of all rules and changes.
- Improved security posture through elimination of inconsistent and redundant rules.
- Simplified compliance using out-of-the-box reports.
- Automated, proactive change management.
- Increased firewall performance through policy optimization and cleanup.

SOLUTION OVERVIEW

As organizations deploy multiple security solutions to safeguard corporate networks from a wide-ranging threats, they are realizing that the traditional manual process of performing risk analysis, change management, auditing and compliance are labor-intensive and error-prone. To increase operational efficiency and reduce risk, Palo Alto Networks™ and AlgoSec have partnered to reduce network security policy complexity by intelligently automating firewall policy management, from optimization to risk analysis to change management.

AlgoSec Security Management Suite integrates with Palo Alto Networks firewalls to improve IT productivity by simplifying the management of application and user aware security policies. AlgoSec automates the complete lifecycle of application and user aware security policies to improve productivity and ensure compliance with regulatory guidelines and Service Level Agreements. With topology awareness and built-in risk and compliance intelligence, the AlgoSec Security Management Suite reveals missing or redundant policies, identifies compliance vulnerabilities, reduces the time required to process changes, mitigates security risks, and assures proper configuration of Palo Alto Networks firewalls.

Intelligent Analysis of Network Security Policies.

PALO ALTO NETWORKS

Palo Alto Networks is the network security company. Its next-generation firewalls enable unprecedented visibility and granular policy control of applications and content – by user, not just IP address – at up to 20Gbps with no performance degradation. Based on patent-pending App-ID™ technology, Palo Alto Networks firewalls accurately identify and control applications – regardless of port, protocol, evasive tactic or SSL encryption – and scan content to stop threats and prevent data leakage. Enterprises can for the first time embrace Web 2.0 and maintain complete visibility and control, while significantly reducing total cost of ownership through device consolidation. Most recently, Palo Alto Networks has enabled enterprises to extend this same network security to remote users with the release of GlobalProtect™ and to combat targeted malware with its WildFire™ service.

ALGOSEC

AlgoSec is the market leader in network security policy management. AlgoSec enables security and operations teams to intelligently automate the policy management of firewalls, routers, VPNs, proxies and related security devices, improving operational efficiency, ensuring compliance and reducing risk. More than 800 of the world's leading enterprises, MSSPs, auditors and consultancies rely on AlgoSec Security Management Suite for unmatched automation of firewall operations, auditing and compliance, risk analysis and the security change workflow. AlgoSec is committed to the success of every single customer, and offers the industry's only money-back guarantee.
