Palo Alto Networks and NetWitness

Technology Segment: Network Forensics

The Palo Alto Networks Technology Partner Program includes a select group of partners that deliver solutions or products that interoperate with the next-generation firewall.

HIGHLIGHTS

- Complete support for access and rule compliance at the user and application level

- Configuration and reporting of threat signatures for integrated threat management

- Full on-demand policy compliance audits (PCI-DSS, NIST, etc.) for next-generation firewalls

- Automated firewall analysis and audits to optimize firewall rule-sets and maintain compliance

- Network modeling and access path analysis to troubleshoot application and user connectivity issues

SOLUTION OVERVIEW

Palo Alto Networks and NetWitness have partnered to provide unified security event analysis and resolution. The combined solution validates application execution, speeds incident investigation and eliminates wasted time navigating disparate systems. Palo Alto Networks' next generation firewalls provide policy-based visibility and control over applications, users and threats. Leveraging this firewall technology improves your security posture and provides excellent visibility into your infrastructure. Combining Palo Alto Networks' next generation firewall with the industry leading network security monitoring capabilities of NetWitness NextGen provides you with detailed insight into everything occurring on your network and enables real-time analytics for reliable application verification, advanced threat detection, and incident resolution. Any security event viewed within Palo Alto Networks Panorama management platform or graphical user interface will link directly to the precise contextual detail behind the event in question, which was recorded by the NetWitness NextGen platform.

NETWITNESS

PALO ALTO NETWORKS

Palo Alto Networks™ (NYSE: PANW) is the network security company. Its innovative platform allows enterprises, service providers, and government entities to secure their networks and safely enable the increasingly complex and rapidly growing number of applications running on their networks. The core of Palo Alto Networks' platform is its Next-Generation Firewall, which delivers application, user, and content visibility and control integrated within the firewall through its proprietary hardware and software architecture. Palo Alto Networks' products and services can address a broad range of network security requirements, from the data center to the network perimeter, as well as the distributed enterprise, which includes branch offices and a growing number of mobile devices. Palo Alto Networks' products are used by more than 9,000 customers in over 100 countries.
