Professional Services:
Firewall Migration

OVERVIEW

Making the transition from a traditional port-based firewall to the next-generation firewall is a straightforward process through Firewall Migration Service. With a combination of tools, expertise and best practices, Palo Alto Networks™ can help analyze your existing environment, migrate policies and firewall settings to the next-generation firewall, and assist with the transition and cutover.

A next-generation firewall expert will assess your current firewall configuration and work with your team to migrate existing rules and objects to the Palo Alto Networks next-generation firewalls.

In addition, the consultant will use a migration tool specifically developed to automate the process and accelerate the work. The migration tool supports the rules and objects from a broad range of firewalls, such as:

- Cisco ASA/PIX/FWSM
- Juniper JUNOS
- NetScreen ScreenOS
- Check Point
- Fortinet
- McAfee Sidewinder

MIGRATION AUDIT

The Palo Alto Networks consultant will work with you to monitor your network traffic, post-migration, and validate the Palo Alto Networks configuration meets your needs and complete fine-tuning of configuration.

The consultant will also validate the configuration implementing next-generation firewall functionality and suggest ways to make full use of features such as:

- App-ID™
- User-ID™
- Content-ID™
- WildFire™
- Global Protect™

Take advantage of Palo Alto Networks Firewall Migration Services to get your project off to a great start.
