

# Palo Alto Networks and ArcSight

## Technology Segment: Security Information and Event Management

The Palo Alto Networks Technology Partner Program includes a select group of partners that deliver solutions or products that interoperate with the next-generation firewall.

### HIGHLIGHTS

- Complete support for access and rule compliance at the user and application level
- Configuration and reporting of threat signatures for integrated threat management
- Full on-demand policy compliance audits (PCI-DSS, NIST, etc.) for next-generation firewalls
- Automated firewall analysis and audits to optimize firewall rule-sets and maintain compliance
- Network modeling and access path analysis to troubleshoot application and user connectivity issues

### SOLUTION OVERVIEW

Palo Alto Networks and ArcSight have partnered to deliver unprecedented visibility and correlation of enterprise network security events. Utilizing the ArcSight Flexconnector and Common Event Format (CEF), Palo Alto Networks' next-generation firewalls add rich context encompassing all user and application activity into ArcSight's Enterprise Security Manager Platform. This integration allows ArcSight to correlate additional relevant data with other data sources into a single cohesive view, unifying critical user, application, and threat visibility.

ArcSight delivers the only enterprise framework that integrates and optimizes the management of all threats and events generated by any source of security-relevant information. By giving security professionals complete monitoring, correlation, investigation, resolution, and reporting—all within a single solution—ArcSight provides a truly coordinated infrastructure that maximizes security results while decreasing overall costs.

**PALO ALTO NETWORKS**

Palo Alto Networks™ (NYSE: PANW) is the network security company. Its innovative platform allows enterprises, service providers, and government entities to secure their networks and safely enable the increasingly complex and rapidly growing number of applications running on their networks. The core of Palo Alto Networks' platform is its Next-Generation Firewall, which delivers application, user, and content visibility and control integrated within the firewall through its proprietary hardware and software architecture. Palo Alto Networks' products and services can address a broad range of network security requirements, from the data center to the network perimeter, as well as the distributed enterprise, which includes branch offices and a growing number of mobile devices. Palo Alto Networks' products are used by more than 9,000 customers in over 100 countries.
