NETWORKS®

Performance. Security. Innovation.

The PA-7050, the fastest next-generation firewall.

No more performance vs. security compromises.

Validate the applications and data that run your business, block known and unknown threats—all without hindering the business.

Takes next-generation firewall security screaming past 100 Gbps.

Purpose-built to analyze, inspect, and protect application traffic on all ports at speeds of up to 120 Gbps.

Simple and flexible chassis architecture.

Easily scales as performance requirements change, managed and licensed as a single system to keep your life simple.
